<b>Name of Department</b>	<b>Department of Sanskrit</b>
<b>Name of the Presenter :</b>	<b>Dr. O. Rama Rao</b>
<b>Date:</b>	<b>08-07-2022</b>
<b>No. of students attended</b>	35
<b>Title:</b>	lecture on <i>The way of treatment of doctor in the modern days”</i> ( <i>Bhishajo bhaishajyam</i> )
<b>Presentation Methodology</b>	Lecture, Q& A
<b>Tools used in presentation</b>	White Board
<b>Brief Report</b>	Modern medicine has done much in the fields of infectious diseases and emergencies to aid cure. In most other fields, it is mostly control that it aims for, which is another name for palliation. Pharmacology, psychopharmacology included, is mostly directed towards such control and palliation too. The thrust, both of clinicians and research, must now turn decisively towards prevention and cure. Also, longevity with well-being is modern medicine’s other big challenge. Advances in vaccines for hypertension, diabetes, cancers etc, deserve attention; as also, the role of meditation, yoga, spirituality etc in preventing disease at various levels. Studies on longevity, life style changes and healthy centenarians deserve special scrutiny to find what aids longevity with wellbeing. A close look at complementary and alternative medicine is needed to find any suitable models they may have, cutting aside their big talk and/or hostility towards mainstream medical care.
