CHAPTER 3: COMMUNITY SERVICE PART

Description of the Activities undertaken in the Community during the Community Service Project. This part could end by reflecting on what kind of values, life skills, and technical skills the student acquired.

I, L. Manjula, student of B.A. HEP, studying in the Government degree college (men), went on to the wards/streets of my village i.e. Bottadasingi. I went with the sheet of socio-economic survey and collected the details of social and economic status of people in the study area on the first week of survey. In the first week, I did the survey for only 10 houses in my street.

During the second week of survey I had collected the health details of people in the study area. In the third week, I had extended the no of houses and collected their details in the fourth week, I had taken the photographic proofs of the survey.

In the fifth week, I enquired about sanitation conditions in their locality on the basis of questionnaire. In the final week, I had prepared the report of the community service project details and gave it to my mentor Dr. Ch. Ramamurthy Sir. He suggested me the necessary corrections. He also helped me in the basis acknowledgement writing.

Describe the problems you have identified in the community

In the village Bothadasingi, the major problems are the all related to sanitation, Primary, the village doesn't even contain the drainage or dumpyard. The waste of the village gets contaminated and due to that dangerous diseases spreads.

The drainage system never works in the village and therefore the waste water from every household flows into the main road which causes a major problem to the vehicles and by-passers the irrigation supply to the fields works very good but the households find the water from their own house i.e. own wells.

Some streets of my village have cement roads but some of them don't. At the time of rainy days it becomes very difficult to walk on these roads. These roads become very dirty and it becomes difficult for even vehicles to travel and go into the village.

Short-term and long-term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

- * There is a waste collection centre in my village that should be implemented
- * Village people should not allow their surroundings for contamination of water, storage of waste etc
- * Drainage idea should be implemented by the village government
- * Several schemes of the government exists therefore village people has to follow the schemes
- * Village secretariat should focus on the road construction
- * People has to follow the waste mangement methods
- * Volunteers of the village should help the people in facing the sanitation problems.
- * Awareness programmes should be conducted to aware the people
- * Wastage from the houses should be continuously collected.

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

There were several awareness programmes that were carried out by the government of A.P and also they are implemented at the rural level by the members of village. The programmes are Bharat mission (SBM) or total sanitation campaign

The outcomes that were understood by the people are as follows like proper cleaning and sanitizing of all good contact surfaces and utensils goods basic housekeeping and maintenance and people are bound to this

The Swachh Andhra Pradesh mission in alignment with swachh Bharat mission by eliminating open defecation eradication manual scavenging and solid and liquid waste management activities to maintain cleanliness

There are also several other programmes which are initiated by the government of India and it also carries out at the rural level of India. It also gives financial aid to the people who can not their lives better by maintaining sanitation and cleanliness.

Report of the mini-project work done in the related subject w.r.t the habitation/village.

A mini-project work in the related subject w.r.t the habitation/village. (For ex., a student of Botany may do a project on Organic Farming or Horticulture or usage of biofertilizers or biopesticides or effect of the inorganic pesticides, etc. A student of Zoology may do a project on Aquaculture practices or animal husbandry or poultry or health and hygiene or Blood group analysis or survey on the Hypertension or survey on the prevalence of diabetes, etc.

The Report shall be limited to 8-10 pages.

The mini-Project assigned to us is the survey on the eye sight capability of people in the study area for that purpose, we took a cardboard and attached a white chart paper on it the chart paper was filled with the alphabets and numbers

I have ensured that the distance between the cardboard and the persons is 6 meters I don't have eye lens glasses but i have varied the size of letters that the people have studied and noted the size of letters and alphabets that they were not able to study from the distance of 6 meters we noted down the details in a tabular form with their name, age, size of the alphabets they have studied viz small extra small, medium, large, extra large.

CHAPTER 6: RECOMMENDATIONS AND CONCLUSIONS OF THE MINI PROJECT

Recommendations:

The test for eye sight vision to the people in the study area was more successful but it can be implemented in a better way. The card board was better arranged. The distance between the person and the card board is enough for 6 meters. But the size of letters can be written in a more scientific way as in the hospitals.

Conclusion:

The report of the mini-project was written in a tabular form under headings name, age, size of the letters that they are capable to read at a distance of 6 meters. The mini-project is helpful to people to know their vision capability. They can also approach the concerned doctor if they have any problem related to their eye sight. These services are also available through to Government hospitals.
