Describe the problems you have identified in the community

In the village Balaga The major problems are all related to sanitation primarily the village doesn't even contain the drainage or dumpyard. The waste of the village gets contaminated and due to that dangerous diseases spread.

The drainage system never works in the village and therefore the waste water from every household flows into the main road which causes a major problem to the vehicles and by passing the irrigation supply to fields works very good but the household finds the water from their own houses i.e. even wells.

Some streets of my village have cement roads but some of them don't. At the time of rainy days, it becomes very difficult to the walk on these roads those roads become very dirty and it becomes difficult for even vehicles to travel and go into the village.

Short-term and long-term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

- *1) There is waste collection center in my village that should be implemented.
- *2) village people not allow their surroundings for contamination of water, storage of water, etc...
- *3) Drainage idea should be implemented by the village government.
- *4) Several schemes of the government exists therefore village people has to follow the schemes.
- *5) village secretariat should focus on the road construction works.
- *6) people has to follow the waste management methods.
- *7) volunteers of the village should help the people in facing the sanitation problems.
- *8) Awareness programmes should be conducted to aware the people.
- *9) wastage from the houses should be continuously collected.

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

There were several awareness programmes that were carried out by the government of AP and also they are implemented at the rural level by the members of village Secretariat. The programmes are Swachh Bharat Mission (SBM) and total Sanitation Campaign.

The outcomes that were understood by the people are as follows like proper cleaning and sanitizing of all food contact surfaces and utensils good basic house keeping and maintenance and people are bound to this.

The Swachh Andhra Pradesh mission in alignment with Swachh Bharat Mission by eliminating open defecation. Godicating manual scavenging and solid cum liquid waste management activities to maintain cleanliness.

There are also several other programmes which are initiated by the government of India and it also carries out at the rural level of India. It also gives financial aid to the people who can get their lives better by maintaining sanitation and cleanliness.

Report of the mini-project work done in the related subject w.r.t the habitation/village.

A mini-project work in the related subject w.r.t the habitation/village. (For ex., a student of Botany may do a project on Organic Farming or Horticulture or usage of biofertilizers or biopesticides or effect of the inorganic pesticides, etc. A student of Zoology may do a project on Aquaculture practices or animal husbandry or poultry or health and hygiene or Blood group analysis or survey on the Hypertension or survey on the prevalence of diabetes, etc.

The Report shall be limited to 8-10 pages.

The mini-project assigned to us is the Survey on the Eye Sight capability of people in the study area for that purpose, we took a card board and attached a white chart paper on it the chart paper was filled with the alphabets and numbers.

I have Ensured that distance between the card board and the person is 6 meters I don't have Eye lens glasses but I have noticed the size of letters that the people have studied and noticed the size of letters and alphabets that they were not able to study from the distance of 6 meters we noted down the details in a tabular form with their name, age, size of the alphabets they have studied viz Small, Extra Small, medium large, Extra large.

CHAPTER 6: RECOMMENDATIONS AND CONCLUSIONS OF THE MINI PROJECT

Recommendations:-

The test for eye sight vision to the people in the study area was more successful but it can be implemented in a better way. The card board was better arranged. The distance between the person and the card board is enough for 6 meters. But the size of letters can be written in a more scientific way as in the hospital.

Conclusion:-

The Report of the mini-project was written in a tabular form under headings name, age, size of the letters that they are capable to read at a distance of 6 meters in the mini-project is helpful to people to know their vision capability.

They can also approach the concerned doctor if they have any problem related to their eye sight. These services are also available through the government hospitals.
