Drinking Water Problems:-

Villages have insufficient access to purified drinking water due to impact of low income, technical shortcomings, community internal management, water contamination from the agricultural chemicals, industries and water disposal. Here, livestock waste and agricultural runoff are major contributors. Water from 16 borewells was declared as unsafe for drinking by the Pollution Control Board, Rural Water Supply (RWS) department.

Instructions :-

- Rain harvesting, recycled waste water allows to overcome scarcity and ease pressure on ground water and other natural water bodies.
- Education is very important to solve the water crisis.
- A water tax on heavy users could deter wasteful water its consumption.
- In villages implementation of direct the borewell should be done. By this people can recharge wherever possible to improve the availability of the water for drinking.
