* Agriculture holding families = 10

* Major have own toilets = 40.

* Houses have grown in the toilet = paddy 1/2

* Avg monthly earning of the house hold = 1000/-

Describe the problems you have identified in the community

In the village perakkulam the major problems are all related to sanitation. Primary the village doesn't even contain the discharge of demand, the waste of the town gets contained and due to that dangerous diseases spread.

The drainage system never works in the village and therefore the waste water from every household flows into the main road and by pass.

The irrigation supply to the field works very good but the house hold finds the water from their own house i.e own wealth.

Some streets of my town have cement road but some of them don't. At the time of rainy days it becomes very difficult to walk on these roads. These roads become very dirty and it becomes difficult for even vehicles to travel and go into the village.

Short-term and long term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

* There is a waste collection Centre in my town that should be important

* village people should not allow their surroundings for contamination of water storage.

* drainage schemes of the government exist there fore village people has to follow the road construction work.

* people has to follow the waste management methods.

* wastage from houses would be continuously collected.

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

There were several awareness programme that were carried out by the government of A.P and also they are important at the saral level by the members of village saral the programme are swachh bharath mission (S.R.M) total sanitation campaign.

Swachh bharath mission in alignment with swachh bharath by eliminating open defecation and solid cum liquid waste management activities to maintain cleanliness.

There are also several other programme which are intiated by the government of india and it also gives financial aid to the people who can get their lives better by maintaining sanitation and clean lines.

Report of the mini-project work done in the habitation/village.

A mini-project work in the related subject w.r.t the habitation/village. (For ex., a student of Botany may do a project on Organic Farming or Horticulture or usage of biofertilizers or biopesticides or effect of the inorganic pesticides, etc. A student of Zoology may do a project on Aquaculture practices or animal husbandry or poultry or health and hygiene or Blood group analysis or survey on the Hypertension or survey on the prevalence of diabetes, etc.

The Report shall be limited to 6 pages.

Name of the town :- Sorikakulam

Project Name :- demography in meher nagar in sorikakulam.

MEHER Nagar is a small street in the Sorikakulam.

Number of houses :- 200 above houses in the Thotapalem
village.

Number of members :- 600 above members of the
member Thotapalem.

all People have the same Problem in the
locality.

-
- The whole area is facing difficulties because of garbage and rubbish on the roads.
 - The stinking smell from the festering garbage and overflowing gutters have become unbearable.
 - In some place the covers of manholes are missing.
 - unhygienic conditions pose a great danger to public health.
 - There is a very bad sanitary air locality.
 - The sweepers do not turn up for cleaning the area for days.
 - our complaints to the authorities concerned have fallen to deaf ears.
 - The stinking smell from the festering garbage and overflowing gutters have become unbearable.
 - The stagnant gutter water on the street is another nuisance.

Recommendations:

Existing recommendations on water, sanitation and hygiene measures in health care facilities are important to provide adequate patient care and protect both patients and staff. These include, sufficient provision of safe drinking water for staff, care givers and patients. Personal hygiene and cleaning adequate and accessible toilets, safe excreta management including keeping excreta (faeces and urine) separate from human contact and safe treatment and disposal cleaning and disinfection and safe management of health care waste.

Conclusion:-

The final chapter summarizes existing sanitation and environment in coastal and water front communities and those on low-lying areas. Enumerates the important considerations for the provision of sanitation.
