own = 10
- Agricultural holding families - 30
- major crops grown in the habitat - Paddy.
- Houses have run toilets - 35
- Avg monthly earnings of the household - ₹1000/-

Describe the problems you have identified in the community

In the area, I surveyed the major problems were related to sanitation. primarily the village doesn't even contain the drainage. the waste of the village gets contaminated and due to that dangerous diseases spreads.

The drainages system never works and there the waste water from every households into the main road and by passes. The irrigation supply to the fields works very good but the house holds finds the water from their own house i.e. own wells

some streets of my village house have connect roads but some of them don't. At the time of rainy days it becomes very difficult to walk on these roads. These roads become very dirty and it becomes difficult for even vehicles too to travel and go into the village.

Short-term and long term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

* There is a waste collection center in my locality that should be implemented

* people should not allow their surroundings for contaminations of water, storage of waste etc - - -

* drinking idea should be implemented by the municipality

* several schemes of the government exists

* village secretariate should focus on the road construction works.

* people has to follow the waste management methods

* wastage from the houses should be continuously collected.

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

These were several awareness programmes that were carried out by the government of AP and also they are implemented at the rural level by the members of village secretariat. The programs are such Swachh Bharath Mission (SBM)

The outcomes that were understood by the people are as follows like proper cleaning and sanitizing of all food contact surface and utensils good basic house keeping and maintenance and people are bound to this.

The swachh Andhrapradesh mission is alignment with SBM by eliminating open defecation, eradicating manual waste management activities to maintain cleanliness.

These are also several other programmes which are initiated by the government of India and it also works out at the rural level of India. It also gives financial aid to the people who can get their lives better by maintaining sanitation and cleanliness.

Report of the mini-project work done in the related subject w.r.t the habitation/village.

A mini-project work in the related subject w.r.t the habitation/village. (For ex., a student of Botany may do a project on Organic Farming or Horticulture or usage of biofertilizers or biopesticides or effect of the inorganic pesticides, etc. A student of Zoology may do a project on Aquaculture practices or animal husbandry or poultry or health and hygiene or Blood group analysis or survey on the Hypertension or survey on the prevalence of diabetes, etc.

The Report shall be limited to 6 pages.

A study on Importance of Sanitation.

Water, sanitation and hygiene service are very important to address the poverty, livelihoods and health. Water is a precious commodity. Provision of sanitation and a clean environment are vital to improve the health and life span of people.

Water and sanitation have been the subjects of considerable recent attention as a result of the declaration by the United Nations General Assembly.

Responsibility for delivering sanitation services at the village level is assigned to the village secretary and they must therefore be at the centre of any strategic sanitation planning process. Municipalities therefore have limited freedom to run their affairs in the way they think best. Nevertheless, steps taken locally can make a real difference to the quality of sanitation services. Those operating at the municipal level of face some constraints, but existing laws and procedures often provide sufficient flexibility to enable

The starting point for developing better sanitation services will normally be analysis of current problems often result from deeper problems relating to limited institutional capacity people's sanitation-related behaviour.

1. develop an improved sanitation the planning is likely to identify some improvements that are obvious and affordable and can be implemented immediately.
2. Note the importance that it gives to monitoring and evaluation of plan outcomes and the use of that information to review progress.
3. By ensuring that people do not defecate in the open, we can completely eliminate such diseases and even more severe ones such as the one.
4. Many of common diseases mentioned earlier such as
5. cleanliness prevents dangerous infectious diseases by keeping away microbes, germs, mosquitoes and other pathogens.
6. Having cleaned fruits and vegetables protect us from germs, pesticides, dust, and unwanted residues on them
7. The problem is at its worst in village, where proper sanitation is not available

villagers defecate in the open, on dry river beds, railway tracks, fields and even directly in water. This causes water and soil pollution.

Moreover, it contaminates and affects ground water as well as surface water, resulting in diseases such as cholera, typhoid, polio, meningitis, hepatitis and dysentery.

Hygiene refers to conditions and practices that help to maintain health and prevent the spread of diseases.

Medical hygiene therefore includes a specific set of practices associated with this preservation of health, for example environmental cleaning, sterilization of equipment, hand hygiene, water and sanitation and safe disposal of medical waste.

To take care of all body parts includes in Individual Hygiene.

1. Always keep the body clean
2. Clean cloths
3. Exercise
4. Good habits
5. Awareness regarding diet and health.

committed individuals to go at least some way to overcoming these constraints.

preparing to plan :-

stage :- 1

preparation to plan

understand current problems

develop solutions

plan village-wide

implement plan

It will only be possible to develop a plan if there is general agreement on the need to plan. Therefore, in a first step, various groups with an interest in sanitation must be talked to, where necessary convinced of the benefits that they will gain from participating in and drawn into the planning process.

CHAPTER 6: RECOMMENDATIONS AND CONCLUSIONS OF THE MINI PROJECT

RECOMMENDATIONS :-

- * Improved sanitation problems, particularly among every village and awareness programmes are conducted.
- * To change in village peoples to improved and cleanliness in their atmosphere and local area particularly House and their streets
- * Identify the who peoples are contaminated to the (wastes) wastes disposals of covers, papers and medical.
- * To improve security among the sanitation problems
- * Village people to support the village secretary and frontline workers
- * To solve problems of sanitation in the new way, sachivalyam and welfare officers build new Rules and Regulations.

CONCLUSION :-

Sanitation, make a priority, promoting safe and hygienic practices, pay attention to the needs of woman and men and provide access to sanitation during crises. to Gather and share information to the volunteers. Health and hygiene messages may be passed on to public using such posters in public places.
