CHAPTER 5: OUTCOMES DESCRIPTION

Details of the Socio-Economic Survey of the Village/Habitation. Attach the questionnaire prepared for the survey.

- * There is a waste collection center in my locality that should be implemented
- * people should not allow their surroundings for cows buminations ab water, storage ab waste etc.
- * prinking idea should be implemented by the municipality
- * Several schemes ab the government exists.
- * village Secretariate should focus on the road construction works
- * people has to follow the waste management methods
- * wastage from the houses should be continuously collected

Describe the problems you have identified in the community

In the area. I saw that the major problems were related to sanitation, primarily the village doesn't even contain the drainage. The water at the village's gets contain filtered and due to that drinking water, diseases spreads.

The drainage system never works and there the waste water, then every house would go to the main road and by pipes, the irrigation supply to the fields works very good, but houses would find the water from their own houses are ownwells.

Some roads at my village have correct roads but some of them don't. At the time of rainy days it becomes very difficult to walk on these roads these roads become very dirty and it become difficult for even vehicles too to travel and go into the village.

Short-term and long term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

there is a waste collection center in my locality that should be implemented.

people should not allow their surrounding to be contaminated at water, staying at waste etc...

drinking water should be implemented by the municipality

several schemes at the government level.

village committee should focus on the road construction.

people have to follow the waste management methods.

waste from the houses should be collected.

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

These are several awareness programmes that were carried out by the government at Ap and also they are implemented at the rural level by the members of village secretariats. The programmes are such as Swachh Bharath Mission (SBM)

The outcomes that were understood by the people are as follows like proper cleaning and sanitising of all food contact surfaces and toilets and basic house keeping and maintaining and people are bound to this.

The Swachh Andhrapradesh mission is aligned with SBM by eliminating open defecation, eradicating manual waste management activities to maintain cleanliness.

There are also several other programmes which are initiated by the government at India and it also carries out at the rural level at India. It gets this job better by maintaining sanitation and cleaning.

Report of the mini-project work done in the related subject w.r.t the habitation/village.

A mini-project work in the related subject w.r.t the habitation/village. (For ex., a student of Botany may do a project on Organic Farming or Horticulture or usage of biofertilizers or biopesticides or effect of the inorganic pesticides, etc. A student of Zoology may do a project on Aquaculture practices or animal husbandry or poultry or health and hygiene or Blood group analysis or survey on the Hypertension or survey on the prevalence of diabetes, etc.

The Report shall be limited to 6 pages.

A study on importance of sanitation;

water, sanitation and give service are very important to address the poverty livelihoods and health water is a precious commodity. provision of sanitation and a clean environment would improve the health and life span of people. water and sanitation have been the subject of considerable recent attention as result of the declaration by United Nations General Assembly.

Responsibilities for delivering sanitation services at the village level is aligned to the village secondary and they must there be at the culture of may strategic sanitation planning process municipalities have for have limited freedom to own their assets in the way they think best nevertheless projects taken actually can make a real difference to the quality can make a real difference to the quality sanitation services these operations at the market level at face some constraints, but existing laws and procedures often - sufficient capability to enables.

Committed individual to go at least some way to
overcoming these constraints.

Preparing to plan:

stage - 1:

preparation to plan
understand current
problems.

develop start-up
planning village-wide
implement plan.

It will only be possible to develop a plan if there
is general agreement on the need to plan, there
for, in a first step various groups with an
interest in sanitation must be talked to where
necessary convinced of the benefits that they
will gain from in and into the planning
process.

The starting point for developing better sanitation services will namely be analysis of current problems often result from deeper problems relating to limited Franchise capacity people's sanitation-related behaviour.

1. develop an improved sanitation the planning is likely to identify some improvement that are feasible and can be implemented immediately.
2. Note the importance that it gives to maintaining and educated at plan cultures and the use of that information to review progress.
3. by answering that people do not defecate in the open, we can combatting diseases such as cholera and even mouse services can slash on the one.
4. many of common diseases mentioned carry such as.
5. cleanliness prevents dangerous infections which be cleaning away microbes, germs and mosquitoes and other pathogens.
6. Having clean fruits and vegetables protect us from germs, pesticides and washed residues on their.
7. The problems is at it's worst in village where proper sanitation is not available
