Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

These were several awareness programmes that were carried out by the government of AP and also they are implemented at the rural level by the members of village secretariat. The programs are such Swachh Bharat Mission (SBM)

The outcomes that were understood by the people are as follows like Proper cleaning and sanitizing of all food contact surfaces and utensils food basic house keeping and maintenance and people are inured to this.

The Swachh Andhra Pradesh mission is alignment with SBM by eliminating open defecation, conducting regular waste management activities to maintain cleanliness.

These are also serves other programmes which are initiated by the government of India and it also carries out it.

the rural level of India, it also gives financial aid to the people who can get this benefit better by maintaining sanitation and cleanliness.

Short-term and long term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

- \* There is a waste collection center in my locality that should be implemented.
- \* People should not allow their surroundings for contamination of water storage of unclean.
- \* Drinking water should be implemented by the municipality.
- \* Sewerage Schemes of the government exists.
- \* Village Secretariat should focus on the road construction works.
- \* People have to follow the waste management methods.
- \* Wastage from the houses should be continuously collected.

**Describe the problems you have identified in the community**

In the area, I surveyed the major problems were related to sanitation. Primarily the village doesn't even contain the drainage the waste of the village gets contained and due to that dangerous diseases spreads.

The drainage system never work and there the waste went from every house holds into the main road and by passing the irrigation supply to the fields works very good both the house holds finds the water from their own house or own wells.

Some streets of my village house have cement roads but some of them don't in the time of rainy days it becomes very difficult to walk on these roads. These roads become very dirty and it becomes difficult for even vehicles to travel and go into the village.
