The drainage system never works and the waste water and by pass, holds into the main road and by fields, water. The irrigation supply to the fields, water very good but the house holds find the water from their own house i.e. own wells!

Some streets of my village houses have connect roads but some of them don't. At the time of rainy days it becomes very difficult to walk on those roads those roads become very dirty and it becomes difficult for over vehicles to travel and go into the village,

The Swachh Andhra Pradesh mission is alignment with SBM by eliminating open defecation eradicating manual waste, management, activities to maintain clean.

There are also several other programs which are initiated by the government of India and it also carries out at the rural level of India. It also gives financial aid to the people who can get their lives better by maintaining sanitation and cleanliness.

Short-term and long term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

- \* There is a waste collection center in my local -ity that should be implemented.
- \* People should not allow their surrounding for contaminations of water & storage of waste etc -

- \* People has to follow the waste management methods

6. Having cleaned fruits and vegetables protect us from germs pesticides, dust, and unworldly residues on fruits, and unworldly

villages, defecates in the open, on ways, river beds, railway tracks, fields and even directly in water. This causes water and soil pollution.

Mosquitoes, if contaminated and affect ground water as well as surface water, resulting in diseases such as cholera, typhoid, Polio, meningitis, hepatitis and dysentery.

Hygiene refers to conditions and practices that help to maintain health and prevent the spread of diseases. Medical hygiene therefore includes a specific set of practices associated with the preservation of health. For example environmental cleaning, sterilization of equipment, hand hygiene, water and sanitation and safe disposal of medical waste.

To take care of all body parts includes individual hygiene.

1. Always keep the body clean

3. Exercise
4. Good habits
5. Awareness regarding diet and health.

Committed individuals to goal least some way to overcome these constraints
