* Need / importance about CSP :-

community service has a number of important benefits. Engaging in community service provides students with the opportunity to become active members of their community and has a lasting, positive impact on society at large.

community service or volunteerism enables students to acquire life skills and knowledge, as well as provide a service to those who need it most. These are some of the common benefits of participating in a community service program.

* Psychological benefits :-

volunteering increases overall life satisfaction and helps you feel good about yourself because you are helping others. It can also help to decrease stress and depression.

* More benefits in CSP project :-

* Social benefit :-

volunteering engages students with the community, creates bonds with the population being served and increases social awareness and responsibility.

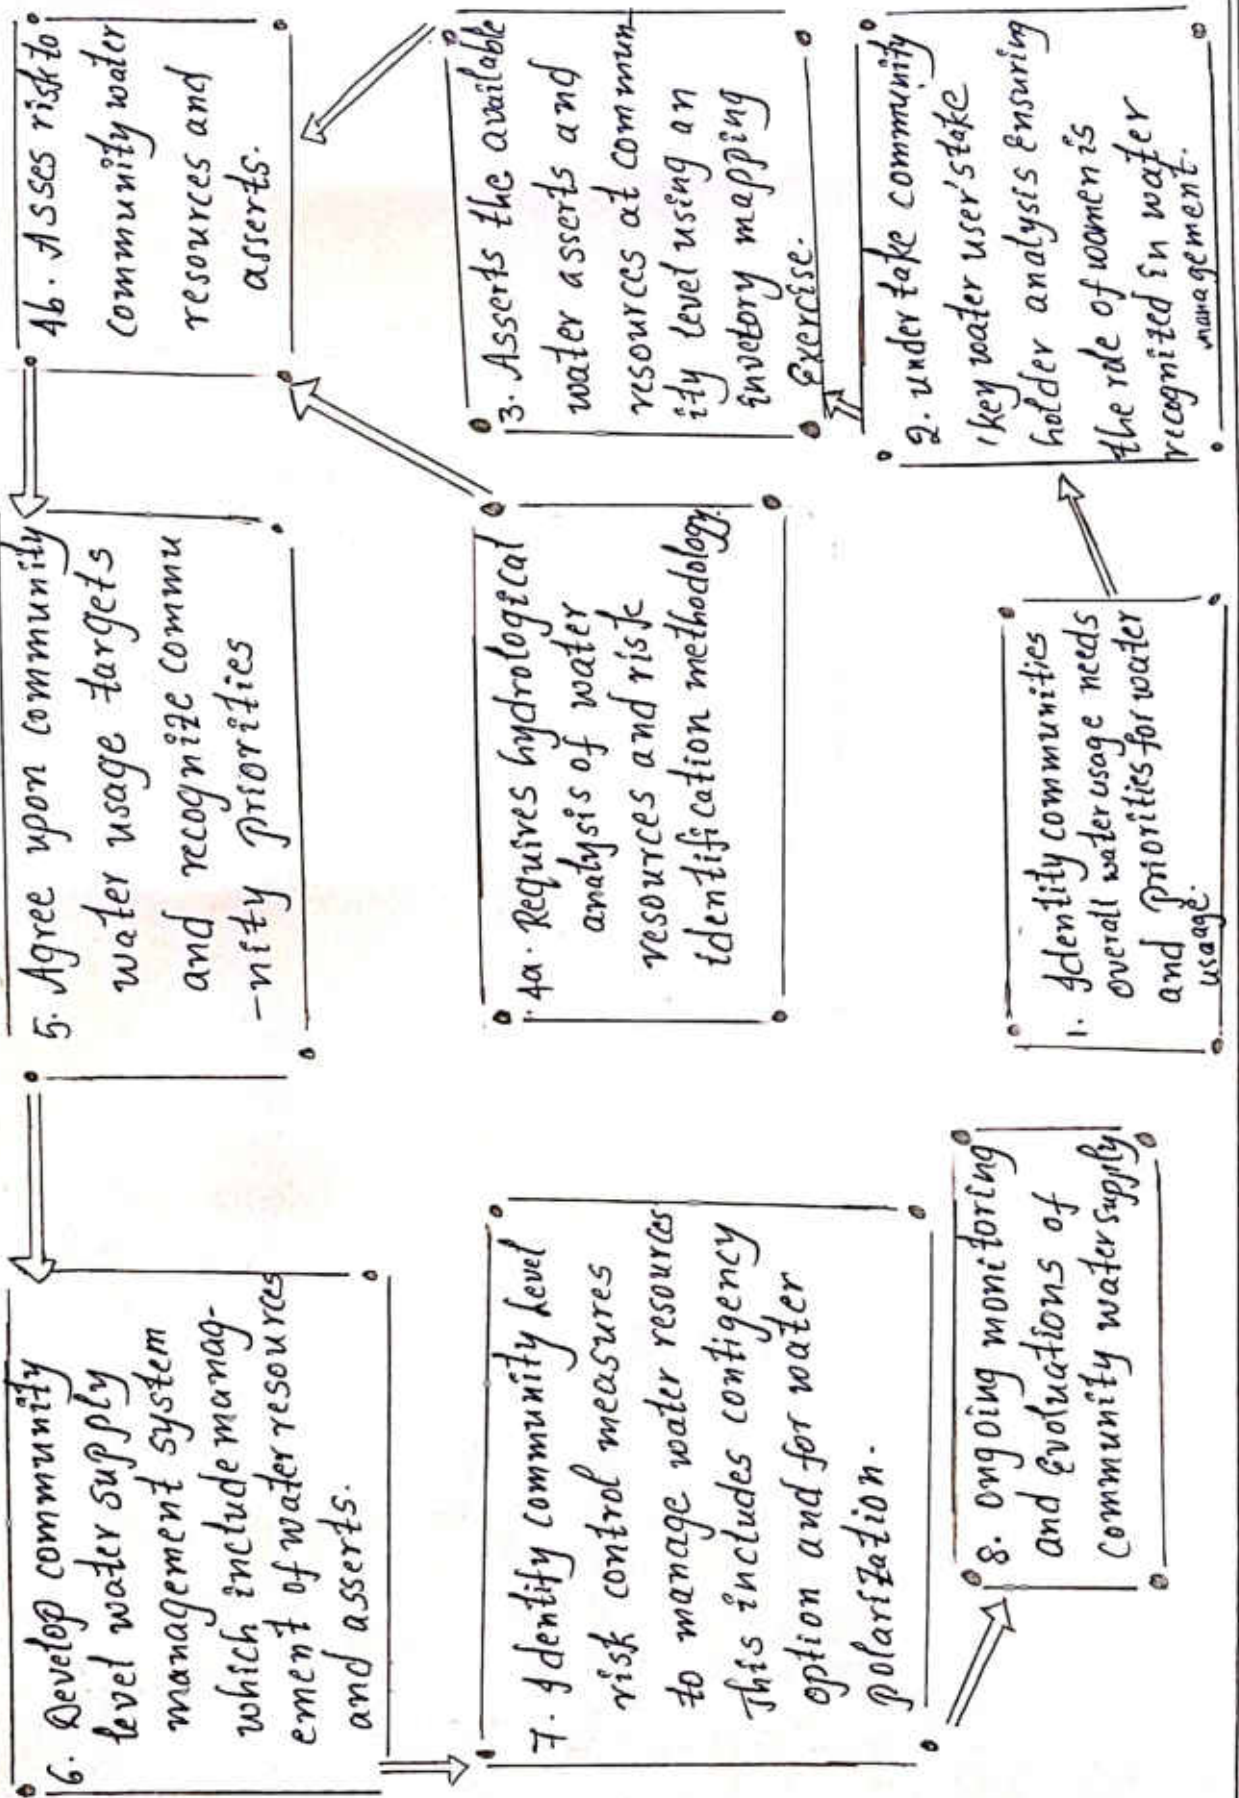

Cognitive Benefits :-

Volunteering helps, students enhance their personal knowledge, grow from new experiences and develop better interpersonal communication skills.

Participating in community service not only makes a difference to the organization and people being served but also makes a difference to every student's career prospects.

Participating in csp activities helps to enhance student's resume by allowing students to obtain work related skills prior to graduation. It builds good reference for employers in regards to community involvement and provides a form to network with future potential employers.

Observations:-

I observed some diseases such as cholera, typhoid, malaria in our village.

Because of water problems some people suffer with illness due to lack of water and drinking water from ponds, lakes etc; water resources are very important we must use water resources carefully.

Precaution:-

- * we drink good water like mineral water.
- * The people who use the well should observe certain precaution to ensure the quality of the water.
- * washing clothes & animals in the surrounding of the well should be prohibited.

Conclusion:-

My name is N. Pravani. I'm pursuing my graduation in BSc MPCs from Government Degree college (Mens) Srikakulam.

I selected "water facilities and drinking water Availability" topic as my community service project. In this community service project I approached nearly 30 families for survey. I asked questions about water sources and available facilities that were using for their daily purpose. As a part of my survey. I knew that majority of families using ground water and community tap water for their regular usages. In today's day to day life everyone needs a good Hygienic water to be wealthy.

I am very happy to doing this community service project for creating awareness towards the people.

- * For the above study in home village, different houses in the village are visited in different places.

- * A log book was maintained to understand the date & time of visit to different residence.
