A PROJECT REPORT

ON

COMMUNITY SERVICE

Submitted in the partial full fulfillment of the requirement
for the award of degree of B.Sc By

SAVARA. NARENDRA

Enrollment Number: 2222001050045

Semester : IInd year B.Sc (MPCS)

Batch : 2022 - 2025

Under the Supervision of

Dr. J. G. S. Jayapala, B.A. Sir

Lecturer in physics department

Government Degree College (M) Srikanth

Phone Number : 9391332394

Web Site : WWW.GCMSKLM.ac.in

CERTIFICATE

Certified that this project report
"Water facilities" And "Drinking Water availability"
being submitted by S. Narendra in partial
fulfillment of the requirements for the award
of Bachelor of Science in physics Department

Honours in the record Bonafide Work done
by them Under the Super - vision during the
academic year

Project - guide

Dr. GVS Jayapalan ES
Lecturer in physics Department
GDC (M)
Srikakulam

DECLARATION!

I hereby declare that the project report entitled "Community Service project" on Water is under the guidance of Dr. G. V. Jayapalan (Sir), Lecturer in physics programme in charge; department of the physics

I collect the data from main Street Diguandambai (v) Seethampathi (m) carried out by me under the guidance of Dr. G. V. Jayapalan Sir

ACKNOWLEDGMENT

At the outset I owe the Honorable Chief Minister of Andhra Pradesh, Sir Y.S. Jagan Mohan Reddy who always cares for the welfare of the students of his State and who allocated a major share of the budget for education sector, and who thinks in novel way for taking the initiative to implement the Community Service project.

I Sincerely thank Dr. P. Balakrishna, Commissioner of Collegiate Education, Andhra Pradesh for his vision in implementing the Community Service project (CSP) in accordance with the NEP-2020, with the problems that confront him in his day to day life.

I am indebted to Dr. Sreelakshmi, principle of Government Degree College (men) Srikakulam for her relentless efforts in enlightening the students by conducting various work shops for effective implementation of the tutorial project.

I am grateful to Dr. [Name], Lecturer in physics and Co-ordinate of Community Service project at [Name] as I know the importance of this project and its role in the stream of social consciousness which is very essential in our demeanor.

my gratitude is due to the in-charge of the department of supervision and in-spirational attitude to words the students for his

I acknowledge the patience and endurance of our mentor

I can't forget the kind cooperation and company of the Sarpanch / Volunteers of Diguvadabai making me to stand before the Society as a disciplined student, for which I am doertim

Definition

Community Service is Work done by a person or group of people that benefits others. It is often done near the area where you live, so you can Community reap the benefits of your Work done you don't get paid to perform Community Service, though. Sometimes food and small gifts like a t-shirt are given to Volunteers.

Community Service can help any group of people in need (children, Senior citizens, people with disabilities, English language learners and more). It can also help animals, such as those at a shelter, and it can be used to improve places, such as local park, historic building or street area, as well. Community Service is often organized through a local group, such as a place of worship, school or non-profit organization. You can also start your own Community Service projects.

More Benefits in Csp Project

Social Benefits :-

Volunteering engages students with the community
Creates bonds with population being served and
Increases social awareness

Cognitive Benefits :-

Volunteering helps students enhance their
personal knowledge grow from new experience and
develop better inter personal communication
skills

Participating in community service not only
makes a difference to the organizations and
people being served but also makes a
difference to every student's career prospects

Forms of Community Service

There are three types of Community Service and Service-Learning; direct, indirect and delivery activities. Community needs identified, the project activities that are developed will align with one or more of the types below are definitions and additional examples of each type of Community Service Activities and Service-Learning

Where Students interact with the recipients of service or the physical environment they have targeted for improvement. You and your chapter members in need or perhaps you can work with your Community Senior Center. Create an activity - a ground packet program that lasts beyond FFA Week.

Indirect Contact with beneficiaries of service, you can organize an indirect service activity where students are being served this can include organizing a channel food drive to donate to a food pantry or a beautification project or participating in a community

Executive Summary

Community programs can expand the opportunities for youth to acquire personal and social assets and to experience the broad range of features of positive developmental settings.

The activities I performed in the Community Service on Socioeconomic Survey and Water facilities and drinking water availability. The activities are of great significance as they effected the surroundings also. It also developed a mind set of "cleaning our surroundings, helps animals and planting more and more trees" in the minds of the people who acknowledged my work.

First I performed Socioeconomic Survey in my village. No. of family members are living, how many members studying, genders for each person, study and profession in the family members all details are collected and ask about social status details, economic status details, health details, other details.

Later ask about White type of Govt. Shama received like Jogamma, Vidhya deevana etc finally asked any problems faced in the village. In this last question many of the family faced more to over mosquitoes problem from drainages.

The second activity, I performed was water facilities and drinking water facilities and drinking water availability. In this village 70% of people use ground water drinking and usage for daily life 30% of family are using own tap with overhead.

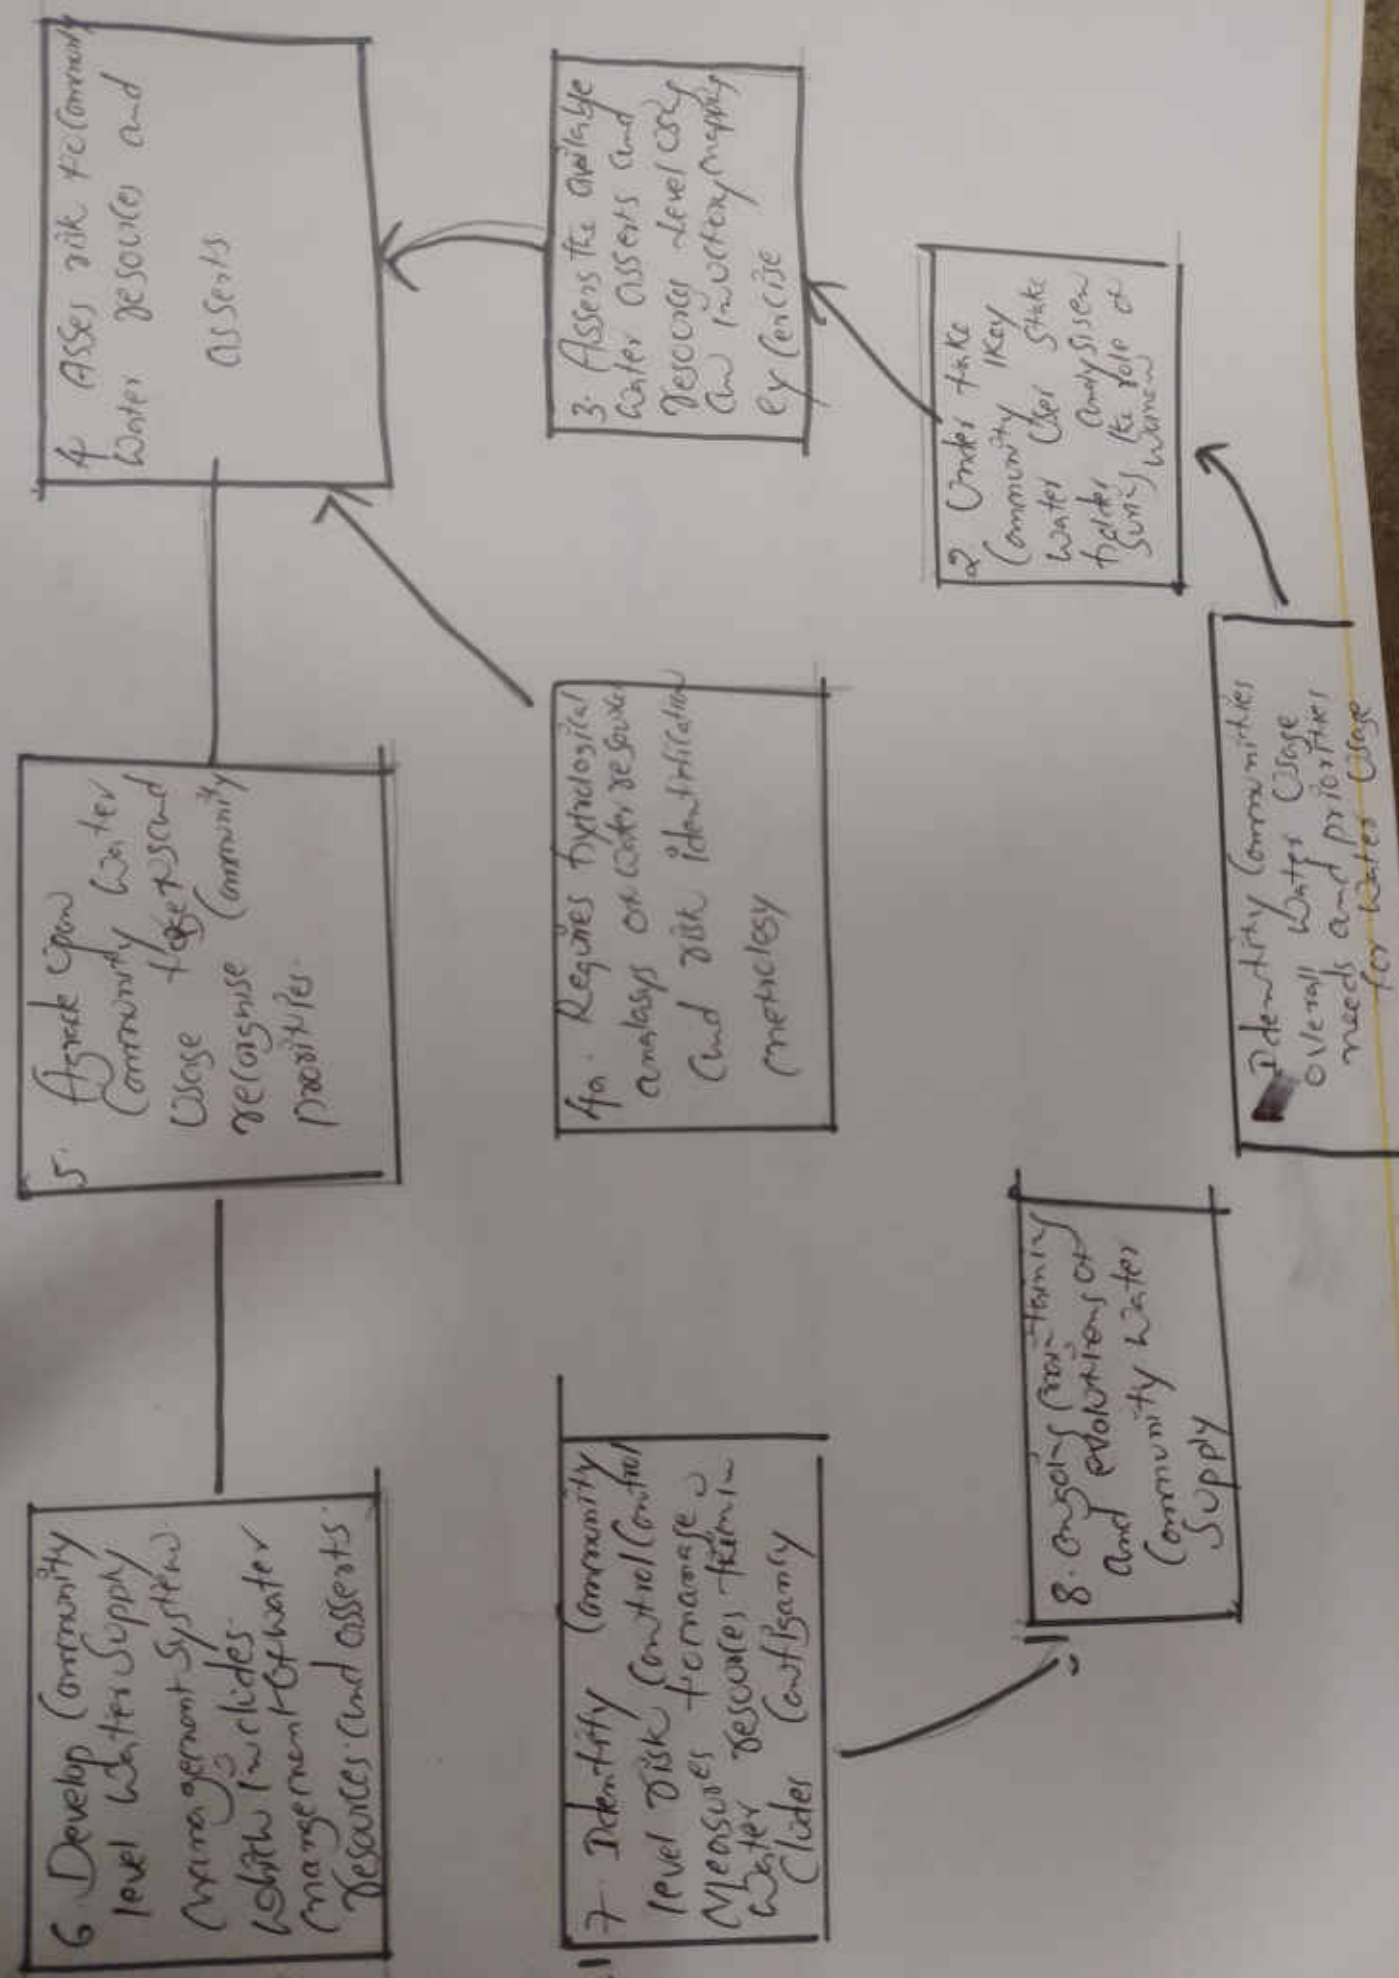

The people said that drinking water was very good what kind of family members using for washup (or) take bath. In rural areas the people only use mostly use bucket and mug. Each family mostly used water per day at least 10ltr. Small family will only used 5 litres per day.

In summer days the people in the village face water shortage. Normal days there is no problem with water with help of community service project. I know the problems are in my village.

The third activity I did was do awareness in the village about the awareness of water saving with my friends and senior citizens.

I take a few minutes to talk about ways to conserve water in my neighborhood and invited people to share the suggestion.

Observation

The activities I performed in the Community Service Society on Socio Economic Survey and Water facilities and drinking water availability the activities are of great significance as they educated the surrounding areas, it also developed a mind set of

"Cleaning our surroundings" without fear of dumping or waste water resistance causing diseases like cholera, diarrhea etc

Awareness on Water:-

Water awareness as we sick using drinking and washing and indirect use I awareness on water with Slogans

* Preserve water presence like.

* Save our water bodies, Save our planet

* Save blue, Save green

Observation

The activities I performed in the Community Services Society on Socio Economic Survey and water facilities and drinking water availability the activities are of great significance as they hold the surrounding area, it also developed a mind set of

"Cleaning our surroundings" without fear of dumping a waste water resistance causing diseases like cholera, diarrhea etc

Awareness on Water:-

Water awareness as we look using drugs and washing and indirect use I awareness on water with Slogans

- * Preserve water presence like
- * Save our water bodies, Save our planet
- * Save blue, Save green

Conclusion:-

I had definitely learned how to be more patience and be more productive the journey from the right beginning that is clearly how can I help the (Community) Society to be a better place, what activities will be well studied among surrounding keep all the facts in mind I figured out few activities that were providing food to the stray animals, plantation in public water waste places, cleaning level drainages.

Each activity had its challenges and impressive outcome. The satisfaction the activity providing me were at different level. Helping out Society, cleaning the Society, cleaning drainages, using waste water for watering plants. Seeing my area after cleaning I finished my work gave me a great feeling I planted flower plants which uses after bathing waste water.

Apart from the water resources and cleaning process I feed the plants with waste water at house goods. Now I have many more friends in my Society with my friends I did a water saving process. I feed the plants with water at house goods and awareness of water waste. To convey that use water for your quality don't waste water for usual purposes.

Title of the Project

"WATER FACILITIES AND DRINKING WATER AVAILABILITY"
Questionnaire for the Project

1. What type of Water System do you have:
a) Own Tap with overhead tank b) Underground water well/bore c) Community Ta
2. What type of water do you use for drinking a) Mineral Water b) Tap Water
Ground Water
3. How do you evaluate the quality of your drinking water
a) Very Good b) Satisfactory c) Dissatisfied
4. Do you drink water from Outside : a) At hotels b) Other Places c) No
5. What kind of Sewage System do you have
a) In house pit
b) Drainage System
c) Polluted Water is driven into open space i.e; Ground etc
6. How do you wash up/take bath
a) By running water under tap b) Use bucket and Mug c) Shower/Sauna
7. What kind of washroom do you use: a) Flush b) Bucket/Mug c) ODF
8. How much Water do you use for a day: a) 20lit b) 30lit c) 40lit d) More
9. Do you experience water shortages
a) No b) Rarely c) Almost every year d) It is constant problem
10. Do you have water conservation methods: a) Pits b) Community action c) None
11. Are you suffering any water borne diseases: a) Malaria b) Cholera c) Scabies d) Typhoid
12. Does the water you use is a) Fluoride water b) Hard water c) None
13. How often do you clean water storage tanks per year
a) Once b) 2-3 times c) 4 times d) >6 times
14. Are you interested to learn Water conservation methods: Yes/No
15. How much water is used in your family per a day
a) 60lit b) 80lit c) 100lit d) More
16. How much water is used for drinking (only) in your total family per a day
a) 30 lit b) 40 lit c) 50 lit d) none
17. Is there any RO System (water plant) in your village: yes/no
18. How many RO System (water plant) are there in your village :
a) 1 b) 2 c) 3 d) None
19. What type of Water bodies are there in your village
a) Pond b) Lake c) River d) a or b
20. Is your village comes under coastal area: yes/no

Title of the Project

"WATER FACILITIES AND DRINKING WATER AVAILABILITY"
Questionnaire for the Project

1. What type of Water System do you have:
a) Own Tap with overhead tank b) Underground water well/bore c) Community Tap
2. What type of water do you use for drinking a) Mineral Water b) Tap Water c) Ground Water
3. How do you evaluate the quality of your drinking water
a) Very Good b) Satisfactory c) Dissatisfied
4. Do you drink water from Outside : a) At hotels b) Other Places c) No
5. What kind of Sewage System do you have
a) In house pit
b) Drainage System
c) Polluted Water is driven into open space i.e; Ground etc
6. How do you wash up/take bath
a) By running water under tap b) Use bucket and Mug c) Shower/Sauna
7. What kind of washroom do you use: a) Flush b) Bucket/Mug c) ODF
8. How much Water do you use for a day: a) 20lit b) 30lit c) 40lit d) More
9. Do you experience water shortages
a) No b) Rarely c) Almost every year d) It is constant problem
10. Do you have water conservation methods: a) Pits b) Community action c) None
11. Are you suffering any water borne diseases: a) Malaria b) Cholera c) Scabies d) Typhoid
12. Does the water you use is a) Fluoride water b) Hard water c) None
13. How often do you clean water storage tanks per year
a) Once b) 2-3 times c) 4 times d) >6 times
14. Are you interested to learn Water conservation methods: Yes/No
15. How much water is used in your family per a day
a) 60lit b) 80lit c) 100lit d) More
16. How much water is used for drinking (only) in your total family per a day
a) 30 lit b) 40 lit c) 50 lit d) none
17. Is there any RO System (water plant) in your village: yes/no
18. How many RO System (water plant) are there in your village :
a) 1 b) 2 c) 3 d) None
19. What type of Water bodies are there in your village
a) Pond b) Lake c) River d) a or b
20. Is your village comes under coastal area: yes/no

1. What type of Water System do you have:
a) Own Tap with overhead tank b) Underground water well/bore c) Community Tap
2. What type of water do you use for drinking a) Mineral Water b) Tap Water c) Ground Water
3. How do you evaluate the quality of your drinking water
a) Very Good b) Satisfactory c) Dissatisfied
4. Do you drink water from Outside : a) At hotels b) Other Places c) No
5. What kind of Sewage System do you have
a) In house pit
b) Drainage System
c) Polluted Water is driven into open space i.e; Ground etc
6. How do you wash up/take bath
a) By running water under tap b) Use bucket and Mug c) Shower/Sauna
7. What kind of washroom do you use: a) Flush b) Bucket/Mug c) ODF
8. How much Water do you use for a day: a) 20lit b) 30lit c) 40lit d) More
9. Do you experience water shortages
a) No b) Rarely c) Almost every year d) It is constant problem
10. Do you have water conservation methods: a) Pits b) Community action c) None
11. Are you suffering any water borne diseases: a) Malaria b) Cholera c) Scabies d) Typhoid
12. Does the water you use is a) Fluoride water b) Hard water c) None
13. How often do you clean water storage tanks per year
a) Once b) 2-3 times c) 4 times d) >6 times
14. Are you interested to learn Water conservation methods: Yes/No
15. How much water is used in your family per a day
a) 60lit b) 80lit c) 100lit d) More
16. How much water is used for drinking (only) in your total family per a day
a) 30 lit b) 40 lit c) 50 lit d) none
17. Is there any RO System (water plant) in your village: yes/no
18. How many RO System (water plant) are there in your village :
a) 1 b) 2 c) 3 d) None
19. What type of Water bodies are there in your village
a) Pond b) Lake c) River d) a or b
20. Is your village comes under coastal area: yes/no
