

Program Book

SEMESTER INTERNSHIP

Designed & Developed by

**ANDHRA PRADESH
STATE COUNCIL OF HIGHER EDUCATION**

(A STATUTORY BODY OF GOVERNMENT OF ANDHRA PRADESH)

PROGRAM BOOK FOR
SEMESTER INTERNSHIP

Name of the Student: L. Seetha Ratnam

Name of the College: Govt Degree college (Men)

Registration Number: 2022001049044

Period of Internship: 4 months From: 9/12/2022 To: 16/03/2023

Name & Address of the Intern Organization

Ambedkar University
YEAR

An Internship Report on

medical

(Title of the Semester Internship Program)

Submitted in accordance with the requirement for the degree of

B.Sc (CBZ)

Under the Faculty Guideship of

Dr R. prameela

(Name of the Faculty Guide)

Department of

Genl Degree college (men) sikkulam

(Name of the College)

Submitted by:

L. Sothe Patnam

(Name of the Student)

Reg.No: 202201019004

Department of Botany (B.Sc)

Genl Degree college (men) sikkulam

(Name of the College)

Student's Declaration

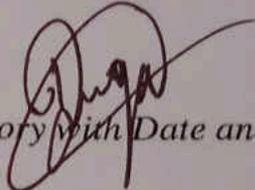

I, Chin a student of Bsc (B-ZC) TM
Program, Reg. No. 2022COL049014 of the Department of Govt Degree College (men)
College do hereby declare that I have completed the mandatory internship
from 27th Dec 2022 to 12th Mar 2023 in OrCHS Hospital (govt) (Name of
the intern organization) under the Faculty Guideship of
Bsc (B-ZC) TM (Name of the Faculty Guide), Department of
Bsc (C-BZ) TM, Govt Degree College (men) Soikalakulam
(Name of the College)

L. Seetha Rathor
(Signature and Date)

Official Certification

This is to certify that Lingala Saethe Patnam (Name of the student) Reg. No. 2022001090111 has completed his/her Internship in GIEMS Hospital (Ragolu) (Name of the Intern Organization) on _____ (Title of the Internship) under my supervision as a part of partial fulfillment of the requirement for the Degree of BSc (B2C) J.M in the Department of govt Degree college (Name of the College).

This is accepted for evaluation.

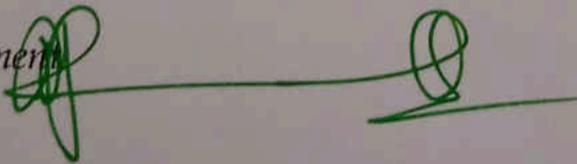

(Signatory with Date and Seal)

Endorsements

Faculty Guide

Head of the Department

Principal

Certificate from Intern Organization

This is to certify that Lingala Seetha Ratnam (Name of the intern)
Reg. No 202200109044 of Govt Degree college (Name of the
College) underwent internship in GEMS Hospital (Ragolu) (Name of the
Intern Organization) from 9/12/2022 to 16/03/2023

The overall performance of the intern during his/her internship is found to be
Satisfactory (Satisfactory/Not Satisfactory).

Authorized Signatory with Date and Seal

CHAPTER 1: EXECUTIVE SUMMARY

The internship report shall have a brief executive summary. It shall include five or more Learning Objectives and Outcomes achieved, a brief description of the sector of business and intern organization and summary of all the activities done by the intern during the period.

this report describes a brief description of the work that has been carried out by me in the laboratory during training at Gems Hospital. there are some department where I have worked and these department where clinical pathology, Hematology, serology, Biochemistry.

clinical pathology :- I have learn how to operate a semi automated wine chemistry analyzer: glucose, protein, ketone urobilinogen, pH etc ...

Bio chemistry :- this section was too fully automated machine which gives the result of glucose, uric acid, cholesterol etc ...

Hematology :- I have learned how to operate the semi automated machine (C.B.C, ESR, etc) the test which conduct in this machine these are RBC, WBC, Platelets and clotting factors

CHAPTER 2: OVERVIEW OF THE ORGANIZATION

Suggestive contents

- A. Introduction of the Organization
- B. Vision, Mission, and Values of the Organization
- C. Policy of the Organization, in relation to the intern role
- D. Organizational Structure
- E. Roles and responsibilities of the employees in which the intern is placed.
- F. Performance of the Organization in terms of turnover, profits, market reach and market value.
- G. Future Plans of the Organization.

A. I worked in the medical department as a intern at GEMS Hospital, sriboothur.

B) To be caring, confident dynamic and respectful of staff, patients and visitors.

C) the internship has to be meaningful and the intern's goal is to gain work experience, overall fell for the industry they were interning in

D) GEMS organization provides good organizational structure which provides effective and integrated care to patients

E) we worked at central laboratory, so we have a chance to work with experienced technicians types of

F) GEMS Hospital have pretty good market value. the organization do have good profits.

CHAPTER 3: INTERNSHIP PART

Description of the Activities/Responsibilities in the Intern Organization during Internship, which shall include - details of working conditions, weekly work schedule, equipment used, and tasks performed. This part could end by reflecting on what kind of skills the intern acquired.

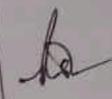

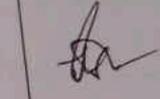

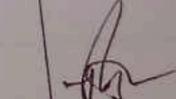

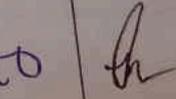

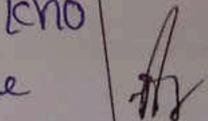

I worked in GREYS Hospital, Solikabuluan. As an Intern we are assigned at central laboratory. With the assistance of working lab technicians, we performed some tests.

In the lab there are two departments they are Pathology and Biochemistry. Lab consists of different machinery with high sophisticated techniques. I did many tests with full of all alertness and with full of self caring during collection of blood samples.

I conducted many tests like blood group determination, CBC (Complete blood count), etc under the supervision of lab technicians.

With the help of this internship program, we have got to know about various tests and their conduct methods. We have got to know about different types of machinery used in the laboratory to conduct tests.

ACTIVITY LOG FOR THE FIRST WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	I want to know various types of machinery.	we observed many things ins.	
Day - 2	I want to know various types of machinery	I got to know different types of machines for different test	
Day - 3	we visited the CATH lab	we observed the too equipment	
Day - 4	we visited the different wards.	we observed the wards	
Day - 5	we visit the sample point	we come to know how to collect sample	
Day - 6	we visit the ICU	we come to know how the ICU patients cared.	

WEEKLY REPORT

WEEK - 1 (From 1st to 2nd)

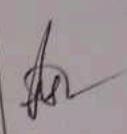

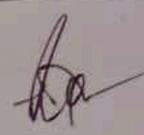

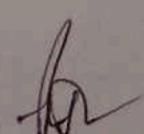

Objective of the Activity Done:

Detailed Report:

In the first week of the Prolonged Pin Group Hospital we observed and visited at of places firstly we came to know the environment and surroundings of the Hospital. Later we observed the CAT lab and observed the equipment in the lab.

we visited the ward and also the sample collection point. And then later ICU - Intensive care unit. As we are new to this place we tried to know about the places in the Hospital.

ACTIVITY LOG FOR THE SECOND WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	we visited sicu (surgical intensive care unit)	offers critical care treatment to unstable, severely ill patients	
Day - 2	we visited picu (pediatric intensive care unit)	Provides sick children with the highest level of medical care	
Day - 3	we visited nicu (neonatal intensive care unit)	Provides 24-hour care to sick newborn babies	
Day - 4	we visited cicu (coronary care unit)	Cares of people who have life threatening	
Day - 5	we visited casualty	Patients with serious injuries	
Day - 6	we visit dialysis unit	Provides the treatment of patient with	

WEEKLY REPORT

WEEK - 2 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

we visited sicu - surgical intensive care unit which provides critical care treatment to unstable, severely patients. the next day we visited picu - pediatric intensive care unit which provides sick children with the highest level of medical care.

then later we visited Nicu - neonatal intensive care unit it provides around the clock care to sick & premature babies.

on fourth day of this week we visited cicu - cardiovascular intensive care. care for people who have life - threatening cases.

And then the next day we visited casualty. patients with serious injuries will be placed there.

lastly we visited the dialysis unit which provides the treatment of patients with renal failure.

ACTIVITY LOG FOR THE THIRD WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	we visited cath lab to know about its purpose	cath lab is important part of treating heart conditions.	<i>Dr</i>
Day - 2	visited cath lab	to treat coronary artery disease & heart attacks.	<i>Dr</i>
Day - 3	I learned how to do group determination	Learned about group determination.	<i>Dr</i>
Day - 4	Today I got to know about different blood collecting tubes	known about different types of tubes	<i>Dr</i>
Day - 5	visited sample collection point	know how to collect blood	<i>Dr</i>
Day - 6	visited came to know about the centrifugation machine.	separates collected blood with serum.	<i>Dr</i>

WEEKLY REPORT

WEEK - 3 (From Dt..... to Dt.....)

Objective of the Activity Done:

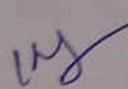

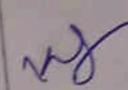

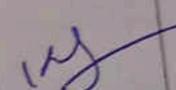

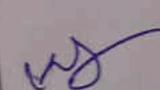

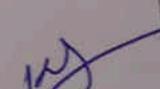

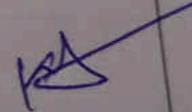

Detailed Report:

we visited CATH lab and know about its purpose. it an important role in treating heart condition. treats coronary artery disease heart attacks chest pains etc.

And then the letter day we came to know about the blood group determination. Next we got to know about the different coloured top tubes which are used for collection of blood visited the sample collection point.

we have got to know about the centrifugation machine which separates clotted blood with serum.

ACTIVITY LOG FOR THE FORTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	observed the wine microscopy	contaminated wine sample placed in the sample	
Day - 2	learned about the wine microscopy examination	wine microscopy examination	
Day - 3	learned about the types of components in wine microscopy	for example puss cells, RBC crystals etc -	
Day - 4	seen the compounds of wine using microscope	different types of cells like puss, RBC	
Day - 5	visited sample collection point	drawn blood from patients	
Day - 6	known about the types of crystals in wine sample	for example coc (Calcium oxalate crystal)	

WEEKLY REPORT

WEEK - 4 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

learned the procedure of kit method of HIV and HCV. it is a screening test. and its interpretations are only one control pot appears - Non reactive.

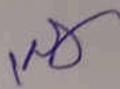

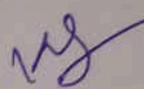

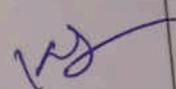

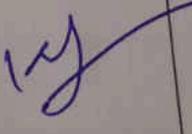

if two dots appears it is reactive
-ve for HIV - I & II one for control and one for HIV
-I & II - same case for HCV also

CBc - complete blood count. this test counts the no. of WBC, RBC, platelets, hemoglobin - etc.

types of tubes:-

EDTA → violet colour tube, dotted - yellow esp.
→ black. PT/APTT - Blue tube,
Heparin → green tube.

ACTIVITY LOG FOR THE FIFTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	visited ECG (electrocardiography) Room	used to check heart rhythm and electrical activity	
Day - 2	Got to know about PPS - S test (post prandial blood sugar)	Blood test done after eating meal	
Day - 3	Got to know about FBS (Fasting blood glucose sugar)	Blood test done after certain time of fast	
Day - 4	Got to know about the PPS test Random blood sugar	It measures blood glucose regardless of when you last ate.	
Day - 5	visited sample collection point	got to know how to collect blood from patient	
Day - 6	observed pathology test -	got to know about pathology tests.	

WEEKLY REPORT

WEEK - 5 (From Dt..... to Dt.....)

Objective of the Activity Done:

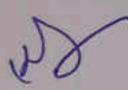

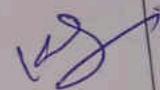

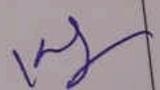

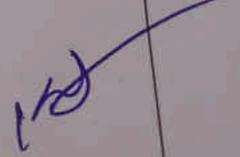

Detailed Report:

electrolyte analyser test used to find out if your body has a fluid imbalance or any imbalance in acid and basic levels.

centrifuge is used to separate the blood from the serum. gel is present in between the blood and serum to prevent mixing.

let test (Liver function test) is an blood test that measures different enzymes, proteins and other substances made by the liver. these test check the overall health of your liver.

ACTIVITY LOG FOR THE SIXTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Visited ECG (Electrocardiography) room	Used to check heart's rhythm and electrical activity	
Day - 2	Got to know about PPBS test (post prandial blood sugar)	Blood test done off eating meal	
Day - 3	Got to know about FBS (fasting blood sugar)	Blood test done after certain time of fast	
Day - 4	Got to know about the PPBS test random blood sugar.	measures blood glucose regardless of when you	
Day - 5	Got to know about visited sample collection point	Got to know how to collect blood from patient	
Day - 6	observed pathology tests.	got to know about pathology tests.	

WEEKLY REPORT

WEEK - 6 (From Dt..... to Dt.....)

Objective of the Activity Done:

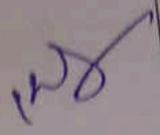

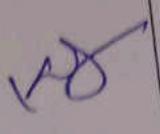

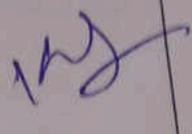

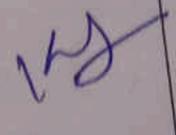

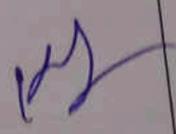

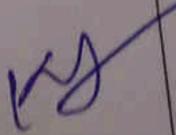

Detailed Report:

ECG → electrocardiography is the process of producing an electrocardiogram recording of the heart's electrical activity through repeated cardiac cycle. ECG can help detect problem with your heart and heart.

PPBS, FBS, RBS, tests are blood sugars tests. These tests are used to see the levels of sugar and different conditions.

Pathology test is the testing of bodily tissues and fluids such as urine, blood etc to determine the presence of a disease.

ACTIVITY LOG FOR THE SEVEN WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	visited sample collection point	Drawed blood from the patients	
Day -2	learned about VDRL test (venereal disease research laboratory)	It is an - sero (sexually transmitted infection)	
Day -3	observed how to do urine physical examination	Got to know about the urine test	
Day -4	Done urine examination using strip	colour change in the strip is observed	
Day -5	known about the tests of urine i.e. - WE, CUF, etc.	got to know about urine examination	
Day -6	visited sample collection point	Collected blood from patients	

WEEKLY REPORT

WEEK - 7 (From Dt..... to Dt.....)

Objective of the Activity Done:

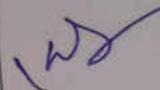

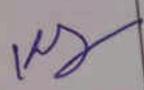

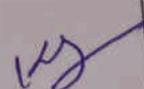

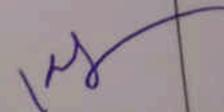

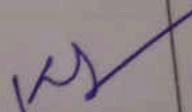

Detailed Report:

we visited sample collection point. we drew blood from the patients with the guidance of the lab technician

VDRL - venereal disease research laboratory. It is an screening test for syphilis. it measures the protein called antibodies which your body may produce if you have come in contact with bacteria that cause syphilis.

we → complete urine examination
It is done by collecting urine sample to diagnose conditions like kidney & liver disease, urinary tract infections, diabetes etc.

ACTIVITY LOG FOR THE EIGHTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	visited cnu Cardiovascular Infesive care)	known about the patient conditions	
Day - 2	visited sample collection point	Drawed blood from patient	
Day - 3	visited ECG room Electro cardio graphy)	know the process of the ECG	
Day - 4	known about the bun tent (blood urea Nitrogen)	to know about working of kidn -ey	
Day - 5	known about the Haemometer	Instrument used to determine the hemoglobin conte -nt in blood	
Day - 6	know about the APIT test (Activated partial -al thromboplastin clotting time)	Blood Coagulation test	

WEEKLY REPORT

WEEK - 8 (From Dt..... to Dt: Dt.....)

Objective of the Activity Done:

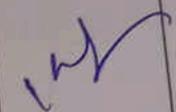

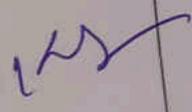

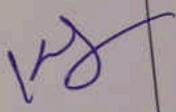

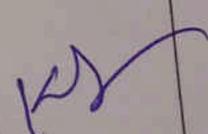

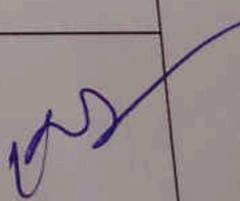

Detailed Report:

this test books a sample of your urine under a microscope. it can see cells from urinary tract, blood cells, crystals, bacteria etc..

the abnormalities which can be seen in urine microscopy are white blood cells might be can sign of an infection. Red blood cells might be can sign of kidney disease. Bacteria, yeast can indicate an infection.

magnesium ammonium phosphate crystals are typically coincide with a urinary tract infection. calcium oxalate crystals can be found in both normal and abnormal urine.

ACTIVITY LOG FOR THE NINTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	known about the ABG test (Arterial blood gas)	measures the amount of oxygen and carbon blood.	
Day -2	known how to conduct ABG test	come to know about the ABG test proced.	
Day -3	known about the RFT (renal function test)	group of tests performed to evaluate the function of kidneys	
Day -4	visited sample collection point	Drewed blood from patients	
Day -5	Done the PPBS FBs test	using the machine conducted sugar test	
Day -6	visited sample collection point.	Drewed blood from patients	

WEEKLY REPORT

WEEK - 9 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

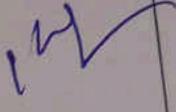

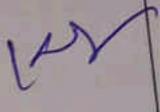

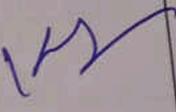

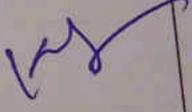

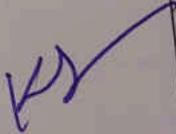

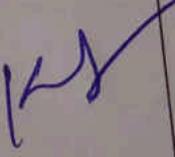

Bun → Blood urea Nitrogen

This test is used to determine how well your kidneys are working. Urea Nitrogen is a waste product that is created in the liver when the body breaks down proteins. Bun levels tend to increase when the kidneys or liver are damaged.

Haemometer → is used to determine the hemoglobin content of the blood by spectrophotometric measurement

APTT → Activated partial thromboplastin clotting time. It measures how long it takes your blood to form a clot.

ACTIVITY LOG FOR THE TENTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Done the VDRL test (venereal disease research laboratory)	test post: using the serum and butter	
Day - 2	known about the syphilis disease	bacterial infection usually spread by.	
Day - 3	known about the syphilis disease	life threatening infections disease	
Day - 4	known about the cetrocedo condoms - Phy	seam used to look at the head and nearby bed	
Day - 5	visited CATH lab	observed the process	
Day - 6	visited sample collection point	Drawed blood from patients	

WEEKLY REPORT

WEEK - 10 (From Dt..... to Dt.....)

Objective of the Activity Done:

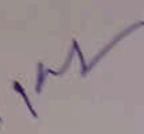

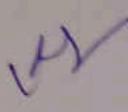

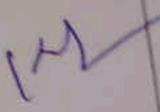

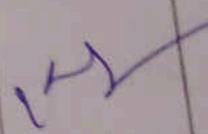

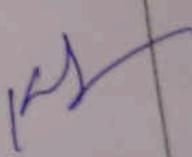

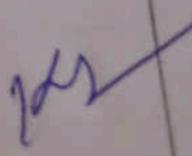

Detailed Report:

ABG (Arterial blood gas) test measures the amount of oxygen and carbon dioxide in your blood.

RFI → Renal function test A test in which blood samples are checked for the amounts of certain substances released by the kidneys.

ABG test also checks the acidity of your blood. This is also called acid-base balance or pH level.

ACTIVITY LOG FOR THE ELEVENTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day -1	known about the troponin test	Troponin test measures the level of troponin protein in the blood	
Day -2	know about the BT CT test (bleeding time & clotting test)	test used to detect haemostatic disorders	
Day -3	visited sample collection point	test uses sound waves to check baby's heart beat	
Day -4	visited ward for blood sample collection	drawed blood from patients	
Day -5	known about the fetal Doppler test	collection of blood sample from patients in ward	
Day -6	visited sample collection point	drawed blood from patients	

WEEKLY REPORT

WEEK - 11 (From Dt..... to Dt.....)

Objective of the Activity Done:

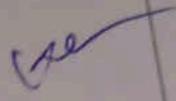

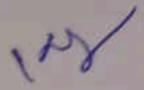

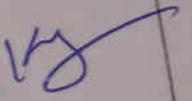

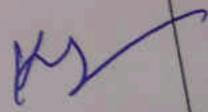

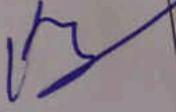

Detailed Report:

Trop test measures the levels of troponin or troponin protein in the blood. these proteins released by when the heart muscle has been damaged.

fetal doppler gives you an opportunity to listen the baby's heart beat. the monitor measures baby's heart beat and how it changes when your baby moves.

BT, ct tests are used to detect occult hemostatic disorders. Normal BT value is 2-9 minutes. normal ct value is 8-15 minutes.

ACTIVITY LOG FOR THE TWELVETH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Done the VDRL test (Venereal disease research laboratory)	test performed using the serum and buffer	
Day - 2	know about the syphilis disease	life threatening infections disease	
Day - 3	know about the Ectoparasite	scanned to look at the heart and nearby be closely	
Day - 4	visited CAITH lab	Observed the process	
Day - 5	visited sample collection point	Drawed blood from patients	
Day - 6	known about the syphilis disease	bacterial infection usually spread by socially sexually	

WEEKLY REPORT

WEEK - 12 (From Dt..... to Dt.....)

Objective of the Activity Done:

Detailed Report:

Done the VDRL test using the strip serum and reagent.

We visited the MTH lab and observed the procedure of the examination. In sample collection point we collected the blood from the patients.

CHAPTER 5: OUTCOMES DESCRIPTION

Describe the work environment you have experienced (in terms of people interactions, facilities available and maintenance, clarity of job roles, protocols, procedures, processes, discipline, time management, harmonious relationships, socialization, mutual support and teamwork, motivation, space and ventilation, etc.)

The medical internship is an phase of training where a graduate or student is expected to conduct actual practice of medical and health care and acquire clinical and nonclinical skills under supervision.

The internship work environment is of the aspects of interns quality addition in this report. The people in the teams are very friendly. First and foremost I had worked mostly in the lab. I need get to know - to trained and examined many things.

They keep the lab very clean and they see the lab every shift. As we are interns we focus on the learning.

CHAPTER 5: OUTCOMES DESCRIPTION

Describe the work environment you have experienced (in terms of people interactions, facilities available and maintenance, clarity of job roles, protocols, procedures, processes, discipline, time management, harmonious relationships, socialization, mutual support and teamwork, motivation, space and ventilation, etc.)

The medical internship is a phase of training where a graduate or student is expected to conduct actual practice of medical and health care and acquire clinical and nonclinical skills under supervision.

The internship work environment is of the aspects of interns' quality addressed in this report. The people in the teams are very friendly. First and foremost I had worked mostly in the lab. I need get to know and trained and examined many things.

They keep the lab very clean and they sweep the lab every shift. As we are interns we focus on the learning.

Describe the real time technical skills you have acquired (in terms of the job-related skills and hands on experience)

There are many technical skills that I have acquired from this medical internship. I have known about how to put my knowledge and skills into the practice. I learned how to communicate and build relationship with the people I had been working.

We have got to know about the many things like different types of machinery, tubes, test etc. we acquired a lot of skills through this internship. I learned that concentration on work is very important aspect during the processing of tests because a little mistake can lead to a lot of mess. We have been working in the lab with the focused mind to prevent any mistakes.

Describe the managerial skills you have acquired (in terms of planning, leadership, team work, behaviour, workmanship, productive use of time, weekly improvement in competencies, goal setting, decision making, performance analysis, etc.

there are some managerial skills have acquired from this internship. I have learned how to effectively deal with the people developing the management skills is one of the important aspect to time and we all shared works as a team. As mentioned we divided into groups. proceeded for different works like one team at biochemistry department, another team at pathology department and another team at sample collection point. we arranged our schedule like this for productive use of time.

Describe how you could improve your communication skills (in terms of improvement in oral communication, written communication, conversational abilities, confidence levels while communicating, anxiety management, understanding others, getting understood by others, extempore speech, ability to articulate the key points, closing the conversation, maintaining niceties and protocols, greeting, thanking and appreciating others, etc.)

For
23-
roll

We have improved a lot during this internship program. First of all we used to observe how the works are getting done. The later we used to get used to it and start identifying & initiating the work like doing a test procedure collecting blood sample etc. we used to ask doubts to the respective lab technicians which helped us to know about lot of things.

As we have been interacted with the faculty we assigned to work more on the every medical test. As the time goes, we become more confident about the conducting tests.

Describe how could you could enhance your abilities in group discussions, participation in teams, contribution as a team member, leading a team/activity.

Team work is one of the important and tough aspect to be done during Intern program.

we as a interns of gem hospital, formed as a team to enhance and improve our work in an efficient and time saving way.

we used to share our thoughts as a team, and also our knowledge regarding the work every week one of us used to take initiative on leading the team. working as a team also as a leader made me know the importance of team work and work time management.

Describe the technological developments you have observed and relevant to the subject area of training (focus on digital technologies relevant to your job role)

The Government has taken a big leap step in implementing technological / knowledge for students. The Grems Hospital uses sophisticated devices in the lab. The present system followed by our hospital is very advanced and upgraded. The equipment in lab are mostly latest updated versions.

We have to know how to deal with the machinery. They were easy to handle and easy to understand. They are very important regarding the tests and test results. These devices play an important role in the medical field. These machinery helps to get test results in effective way and helps in time management.

Student Self Evaluation of the Short-Term Internship

Student Name: L. Seetha Ratnam	Registration No: 2022001049044
Term of Internship: 4 months From: 09/12/2022	To: 16/03/2023
Date of Evaluation: 18/7/2023	
Organization Name & Address: GEMS Hospital (Ragolu) Srikakula -m	

Please rate your performance in the following areas:

Rating Scale: Letter grade of CGPA calculation to be provided

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Proactiveness	1	2	3	4	5
4	Interaction ability with community	1	2	3	4	5
5	Positive Attitude	1	2	3	4	5
6	Self-confidence	1	2	3	4	5
