* Observation:-

I observed some diseases such as Cholera, Typhoid, Malaria in our village. Because of water problems. Some people suffer with illness due to lack of water and drinking water from ponds, lakes etc.....

Water resources are very important we must use water resources carefully.

➔ Precautions:-

- ➔ We drink good water like mineral water.
- ➔ The people who use the well should observe certain precaution to ensure the quality of the water.
- ➔ Washing clothes & animals in the surroundings of the well should be prohibited.

➔ Conclusion :-

My name is K. Hari prasad. I'm pursuing my graduation in B.Sc Mpcas from Government Degree College (Men) Srikakulam.

I selected "WATER FACILITIES AND DRINKING WATER AVAILABILITY" topic as my community services project, approached about water nearly 20 families for survey. I asked questions about water sources and available facilities that were using water for their daily purposes. As a part of my survey, I know that majority of families using ground water usages. In today's Day to Day life everyone needs a good hygienic water to be healthy.

I am very happy to doing this community service project for creating awareness towards the people.

> For the above study in home village. Different houses in the village are visited in different place.

> A long book was maintained to understand the date & time of visit to different Residence....
