OBSERVATION:-

I observed some disease such as "colera typhoid", malaria in our village. Because of water problem's. some people suffer with illness due to lack of water and drinking water from ponds, lanes etc. water resources are very imp. we must use water resources carefully.

Precautions:-

- * we drink good water like mineral water.
- * the people who use the well should observation - precaution to ensure the availability of water.
- * washing of clothes and animals in surrounding of well should be prohibited.

Conclusion:-

I had definitely learned how to be more patient and more productive. The journey from helping the community & society to be a better place. What activities will be well suited to my surroundings - keep all the facts in mind I figured out few activities, that were providing food to the stray animals, plantation in public water wastage places. Clearing up level drainages.

Each activities met it's challenges and impressive outcome. The satisfaction the activity providing me at different levels helping out society truly. Set a different prospect. It changed my view towards the society, clearing the society. I finished my work gave me great feeling. I planted flowerly. :- plants which used after bathing or clearing wast water.

A part from the water resource's and clearing process. I fed the plants with wast water of house food.

with my friend's I did a water saving process I feed the plants with water wastage. to convey that use water for your quantity don't wastage water for equal purposes.

(like.

- * Turn off the water while brushing your teeth.
- * If you wash dishes by hand, don't leave the water running for rinsing.
- * Water your lawn only when it needs it.
- * And use community, water service water carefully.
- * Check your toilet for leaks.

I am looking forward to help the society in a many ways as possible. As we know small changes make a huge difference. I will ever promote. The idea of community services as a general responsibility for all.
