I would like to Express my gratitude to all those who gave me the possibility to Complete this Community Service project. Special thanks to my mentor.

Sir whose help to Stimulating Suggestions and Encouragement helped me to Complete the project.

I would like to thank all the Staff from the department of physics for their able guidance & Support to complete the project. I would like to extend my gratitude to our principal madam for her tremendous Support in completing the project.

## WHAT IS MEANT BY COMMUNITY

### SERVICE PROJECT

Community Service is work done by a person or group of people that benefits others. It is often done near the area where you live. So your own community reaps the benefits of your work you do not get paid to perform Community Service through. Sometimes food and

Small gifts like a t-shirts are given to volunteers.

Community Service can help any group in need. children, Senior citizens, people with disabilities, English language learners. Such as those at a Shelter and it can be used to improve places such as local park, historic building or Service area as well.

Community Service is often organized through to local group such as a place of worship School (or) non profit organization.

## \* Need / Importance about CSP :-

Community Service has a number of important benefits. Engaging in Community Service provides Students with the opportunity to become active members of their Community and has a lasting, positive impact of Society at large.

Community Service or volunteerism Enable Students to acquire like Skills and knowledge as well as provide a Service to those who need it most. These are some of the common benefits of participating in Community Service program.

## \* Psychological benefits :-

Volunteering increases over all life. Satisfaction and helps you feel good about yourself because you are helping others. It can also helps to decrease Stress and ease depressions.

\* More Benefits in C.S.P. project.

\* Social Benefit :-

Volunteering Engages Students with the Community, Creates bonds with the population being Served and increased Social awareness and responsibility.

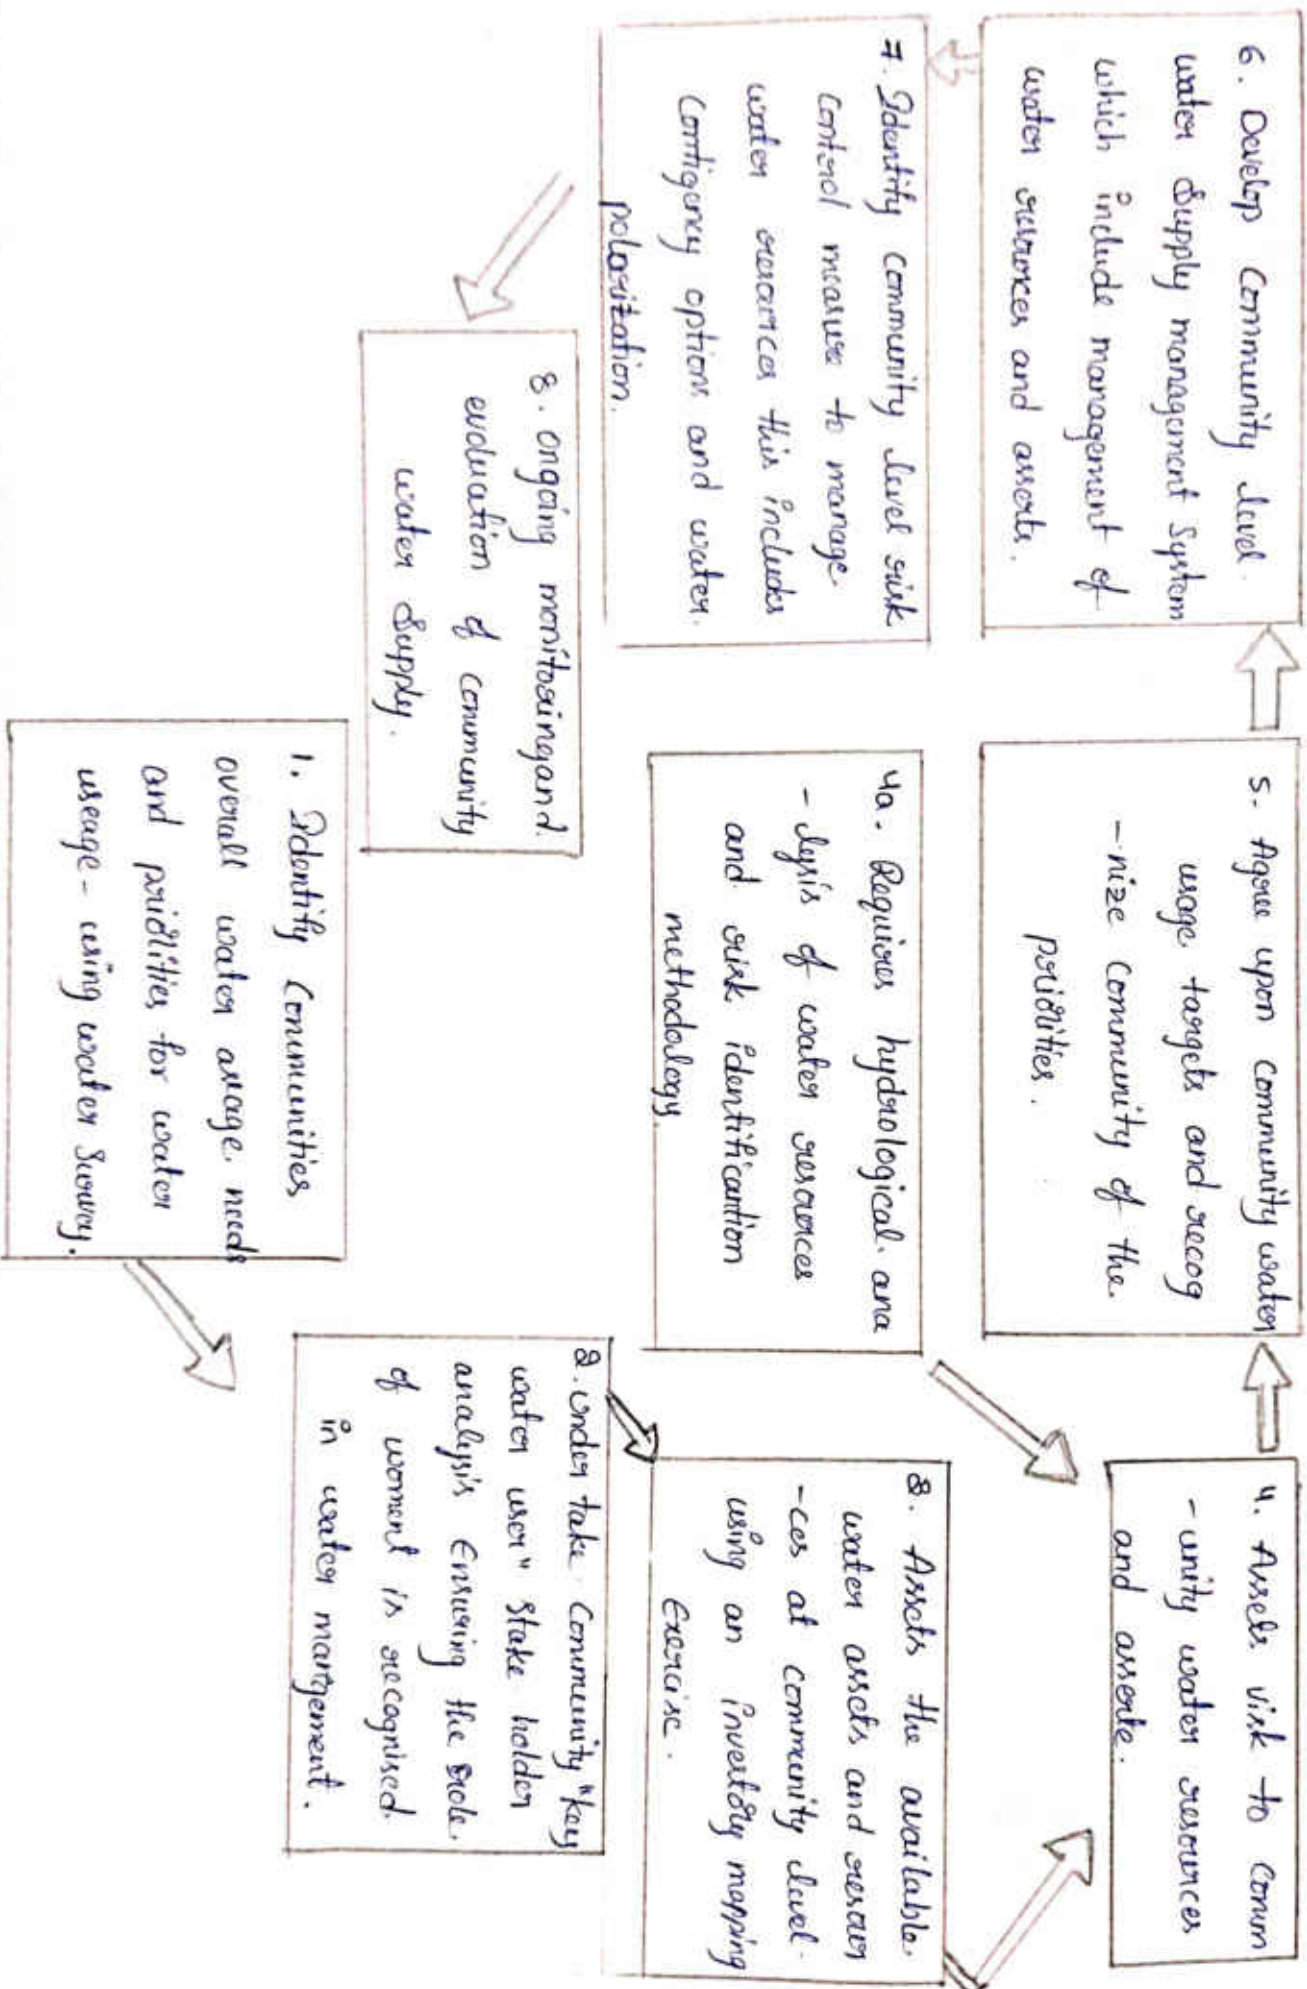

Cognitive Benefits :-

Volunteering helps, Students Enhance their personal knowledge, grow from new Experience and develop better inter personal Communication Skills.

participating in Community Service not only makes a difference to the organization and people being Served but also makes a difference to Every Students Career prospects.

participating in CSP activities helps to enhance Students resume by allowing Students to obtain work related skills! prior to graduation builds good resume for Employees in regards to community involvement and provides a forum to network with future potential employment.

# COMMUNITY BASED WATER RESOURCE MANAGEMENT

## Executive Summary.

Community programs can expand the opportunities for youth to acquire personal and social assets and to experience the broad range of futures of possible developmental of the settings.

The activities I performed in the Community Service on Socio Economic Survey and water facilities and drinking water availability. The activities are of great significance as they effected the surroundings a lot. It also developed a mind set of "cleaning our surroundings helping animals and planting more and more trees" in the minds of the people who acknowledged my work.

First I performed Socioeconomic Survey in my village. No. of family members are living how many members studying. Gender for each person, Study and profession in the family members all details are collected. Status details. health details. other defects.

later ask about which type of Govt. Schemes received like Jagananna vidhya deevena etc. finally asked any problems faced in the villege In this last questions. many of the families failed more over mosquitoes problem from drainages.

The second activity I performed was water facilities and drinking water facilities and drinking water availability in this village 70% of people use ground water drinking and usage for daily life. 30% of family are using own tap with overhead.

The people said that drinking water was very good. What kind of family members using for washup (or) takepath. In rural areas the people only use mostly use bucket and mug. Each family mostly used water and mug. Each family mostly used water per day of least 100ltr. Small family will only used 50 litres per day.

In summer days people in the village face water shortage. Normal days there is no problem with water with help of Community Service project. I know the problems are in my village.

The third activity I did was do awareness in the village. I did the awareness of water saving with my friends and senior citizens.

I take a few minutes to talk about ways to conserve water in your neighbourhood and invite people to share the suggestions.

### observation :-

I observed some diseases such as cholera, typhoid, malaria, in our village. Because of water problems. Some people suffer with illness due to lack of water and drinking water from ponds, lakes etc. water resources are very important. we must use water resources carefully.

### precautions :-

- \* We have to drink mineral water.
- \* The people who are the well should observe certain precaution to ensure the quality of the water.
- \* Washing of clothes & animals in the surroundings of the well should be prohibited.
