Describe the problems you have identified in the community

In the village Belamara the major problems are all related to sanitation primarily the village doesn't even contain the drainage or dumpyard. The waste of the village gets contaminated and due to that dangerous diseases spread.

The drainage system never works in the village and therefore the waste water from every household flows into the mainroad which causes a major problem to the vehicles and by passing the irrigation supply to the fields works very good but the households find the water from their own house i.e. own wells.

Some streets of my village have cement roads but some of them don't. At the time of rainy days it becomes very difficult to walk on these roads. These roads become very dirty and it becomes difficult for even vehicles too to travel and go into the village.

Short-term and long term action plan for possible solutions for the problems identified and that could be recommended to the concerned authorities for implementation.

* There is a waste collection centre in my village that should be implemented

* Village people should not allow their surroundings for contamination of water storage of waste etc.

* Drainage idea should be implemented by the village government

* Several schemes of the government exists therefore village people has to follow the schemes.

* Village secretary should focus on the road construction works

* People has to follow the waste management methods

* Volunteers of the village should help the people in facing the sanitation problems

* Awareness programmes should be conducted to aware the people

* Wastage from the houses should be continuously collected.

Description of the Community awareness programme/s conducted w.r.t the problems and their outcomes.

There were several awareness programmes that were carried out by the government of A.P and also they are implemented at the rural level by the members of village secretariats. The programmes are swachh Bharat mission (SBM) or Total sanitation campaign

The outcomes that were understood by the people are as follows like proper cleaning and sanitizing of all food contact surfaces and utensils good basic housekeeping and maintenance and people are bound to this

The swachh Andhra Pradesh mission in alignment with swachh Bharat mission by eliminating open defecation eradicating manual scavenging and solid and liquid waste management activities to maintain cleanliness

There are also several other programmes which are initiated by the government of India and it also carries out at the rural level of India. It also gives financial aid to the people who can get their lives better by maintaining sanitation and cleanliness

Report of the mini-project work done in the related subject w.r.t the habitation/village.

A mini-project work in the related subject w.r.t the habitation/village. (For ex., a student of Botany may do a project on Organic Farming or Horticulture or usage of biofertilizers or biopesticides or effect of the inorganic pesticides, etc. A student of Zoology may do a project on Aquaculture practices or animal husbandry or poultry or health and hygiene or Blood group analysis or survey on the Hypertension or survey on the prevalence of diabetes, etc.

The Report shall be limited to 6 pages.

The main project assigned to us is the survey on the eye sight capability of people in the study area for that purpose we took a cardboard and attached a white chart paper on it. The chart paper was filled with the alphabets and numbers.

I have ensured that the distance between the cardboard and the persons is 6 meters. I don't have eye lens glasses but I have noticed the size of letters that the people have studied and noticed the size of letters and alphabets that they were not able to study from the distance of 6 meters we noted down the details in a tabular form with their name, age, size of the alphabets they have studied viz. small, extra small, medium, large, extra large.

CHAPTER 6: RECOMMENDATIONS AND CONCLUSIONS OF THE MINI PROJECT

Recommendations:

The test for eye sight vision to the people in the study area was more successful but it can be implemented in a better way. The card board was better arranged. The distance between the person and the card board is enough for 6 meters but the size of letters can be written in a more scientific way as in the hospitals.

Conclusion:

The report of the mini-project was written in a tabular form in headings name age, size of the letters that they are capable to read at a distance of 6 meters. The mini-project is helpful to people to know their vision capability. They can also approach the wharhed doctor if they have any problem related to their eye sight. These services are also available through the government hospitals.
